## Interview Summary

**Application No.**

10/677,309

**Applicant(s)**

SUZUKI ET AL.

**Examiner**

Maureen G. Arancibia

**Art Unit**

1792

All participants (applicant, applicant's representative, PTO personnel):

(1) Maureen G. Arancibia.

(3) \_\_\_\_\_.

(2) Stefan Koschmieder.

(4) \_\_\_\_\_.

Date of Interview: 30 December 2008.

Type: a) ☒ Telephonic b) ☐ Video Conference  
c) ☐ Personal (copy given to: 1) ☐ applicant 2) ☐ applicant's representative)

Exhibit shown or demonstration conducted: d) ☐ Yes e) ☒ No.

If Yes, brief description: \_\_\_\_\_.

Claim(s) discussed: 1.

Identification of prior art discussed: '567 to Lawrence, Falster, '875 to Lawrence.

Agreement with respect to the claims f) ☐ was reached. g) ☒ was not reached. h) ☐ N/A.

Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: See Continuation Sheet.

(A fuller description, if necessary, and a copy of the amendments which the examiner agreed would render the claims allowable, if available, must be attached. Also, where no copy of the amendments that would render the claims allowable is available, a summary thereof must be attached.)

THE FORMAL WRITTEN REPLY TO THE LAST OFFICE ACTION MUST INCLUDE THE SUBSTANCE OF THE INTERVIEW. (See MPEP Section 713.04). If a reply to the last Office action has already been filed, APPLICANT IS GIVEN A NON-EXTENDABLE PERIOD OF THE LONGER OF ONE MONTH OR THIRTY DAYS FROM THIS INTERVIEW DATE, OR THE MAILING DATE OF THIS INTERVIEW SUMMARY FORM, WHICHEVER IS LATER, TO FILE A STATEMENT OF THE SUBSTANCE OF THE INTERVIEW. See Summary of Record of Interview requirements on reverse side or on attached sheet.

/Maureen G. Arancibia/  
Examiner, Art Unit 1792

/Parviz Hassanzadeh/  
Supervisory Patent Examiner, Art Unit 1792

## Summary of Record of Interview Requirements

### Manual of Patent Examining Procedure (MPEP), Section 713.04, Substance of Interview Must be Made of Record

A complete written statement as to the substance of any face-to-face, video conference, or telephone interview with regard to an application must be made of record in the application whether or not an agreement with the examiner was reached at the interview.

#### Title 37 Code of Federal Regulations (CFR) § 1.133 Interviews Paragraph (b)

In every instance where reconsideration is requested in view of an interview with an examiner, a complete written statement of the reasons presented at the interview as warranting favorable action must be filed by the applicant. An interview does not remove the necessity for reply to Office action as specified in §§ 1.111, 1.135. (35 U.S.C. 132)

#### 37 CFR §1.2 Business to be transacted in writing.

All business with the Patent or Trademark Office should be transacted in writing. The personal attendance of applicants or their attorneys or agents at the Patent and Trademark Office is unnecessary. The action of the Patent and Trademark Office will be based exclusively on the written record in the Office. No attention will be paid to any alleged oral promise, stipulation, or understanding in relation to which there is disagreement or doubt.

The action of the Patent and Trademark Office cannot be based exclusively on the written record in the Office if that record is itself incomplete through the failure to record the substance of interviews.

It is the responsibility of the applicant or the attorney or agent to make the substance of an interview of record in the application file, unless the examiner indicates he or she will do so. It is the examiner's responsibility to see that such a record is made and to correct material inaccuracies which bear directly on the question of patentability.

Examiners must complete an Interview Summary Form for each interview held where a matter of substance has been discussed during the interview by checking the appropriate boxes and filling in the blanks. Discussions regarding only procedural matters, directed solely to restriction requirements for which interview recordation is otherwise provided for in Section 812.01 of the Manual of Patent Examining Procedure, or pointing out typographical errors or unreadable script in Office actions or the like, are excluded from the interview recordation procedures below. Where the substance of an interview is completely recorded in an Examiner's Amendment, no separate Interview Summary Record is required.

The Interview Summary Form shall be given an appropriate Paper No., placed in the right hand portion of the file, and listed on the "Contents" section of the file wrapper. In a personal interview, a duplicate of the Form is given to the applicant (or attorney or agent) at the conclusion of the interview. In the case of a telephone or video-conference interview, the copy is mailed to the applicant's correspondence address either with or prior to the next official communication. If additional correspondence from the examiner is not likely before an allowance or if other circumstances dictate, the Form should be mailed promptly after the interview rather than with the next official communication.

The Form provides for recordation of the following information:

- Application Number (Series Code and Serial Number)
- Name of applicant
- Name of examiner
- Date of interview
- Type of interview (telephonic, video-conference, or personal)
- Name of participant(s) (applicant, attorney or agent, examiner, other PTO personnel, etc.)
- An indication whether or not an exhibit was shown or a demonstration conducted
- An identification of the specific prior art discussed
- An indication whether an agreement was reached and if so, a description of the general nature of the agreement (may be by attachment of a copy of amendments or claims agreed as being allowable). Note: Agreement as to allowability is tentative and does not restrict further action by the examiner to the contrary.
- The signature of the examiner who conducted the interview (if Form is not an attachment to a signed Office action)

It is desirable that the examiner orally remind the applicant of his or her obligation to record the substance of the interview of each case. It should be noted, however, that the Interview Summary Form will not normally be considered a complete and proper recordation of the interview unless it includes, or is supplemented by the applicant or the examiner to include, all of the applicable items required below concerning the substance of the interview.

A complete and proper recordation of the substance of any interview should include at least the following applicable items:

- 1) A brief description of the nature of any exhibit shown or any demonstration conducted,
- 2) an identification of the claims discussed,
- 3) an identification of the specific prior art discussed,
- 4) an identification of the principal proposed amendments of a substantive nature discussed, unless these are already described on the Interview Summary Form completed by the Examiner,
- 5) a brief identification of the general thrust of the principal arguments presented to the examiner,  
(The identification of arguments need not be lengthy or elaborate. A verbatim or highly detailed description of the arguments is not required. The identification of the arguments is sufficient if the general nature or thrust of the principal arguments made to the examiner can be understood in the context of the application file. Of course, the applicant may desire to emphasize and fully describe those arguments which he or she feels were or might be persuasive to the examiner.)
- 6) a general indication of any other pertinent matters discussed, and
- 7) if appropriate, the general results or outcome of the interview unless already described in the Interview Summary Form completed by the examiner.

Examiners are expected to carefully review the applicant's record of the substance of an interview. If the record is not complete and accurate, the examiner will give the applicant an extendable one month time period to correct the record.

#### Examiner to Check for Accuracy

If the claims are allowable for other reasons of record, the examiner should send a letter setting forth the examiner's version of the statement attributed to him or her. If the record is complete and accurate, the examiner should place the indication, "Interview Record OK" on the paper recording the substance of the interview along with the date and the examiner's initials.

Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Applicant's Representative presented arguments against the rejection of the claims as set forth in the final rejection of 22 October 2008. Applicant's Representative argued that one of ordinary skill in the art would not substitute only the annealing step of Falster for the gettering step of Lawrence '567, but at best would only substitute the annealing/cleaning of Falster for the gettering/etching of Lawrence '567, and that such a substitution would exclude etching and thus be contradictory to the claimed limitation of etching to a depth of about 1 micron. Applicant's Representative argued that Falster is not relevant to reclaiming used silicon wafers, but only removing copper from a polished surface. Examiner maintained that Falster is actually concerned with removing copper that has diffused to the interior of the silicon wafer (ex. Column 2 of Falster), and that both Lawrence '567 and Falster are concerned with solving the same problem of removing contaminants from the interior of the wafer. One of ordinary skill in the art, taking the teachings of Lawrence '567 and Falster as a whole, would recognize that the etching step of one versus the cleaning step of the other are not contradictory teachings, but rather directed to the same goal of removing contaminants that have been moved to the surface of the wafer, and differing only in degree. Applicant's Representative suggested to amend the claims to further limit the silicon wafer to be processed to a wafer containing a certain amount of copper contamination, said amount being greater than anything suggested to be removed by the method of Falster, and inquired if such an amendment would help to advance prosecution. Examiner responded that such a proposed amendment would require further consideration and/or search. Applicant's Representative argued that it is non-obvious to employ the teachings of Lawrence '875, since Lawrence '875 teaches only to remove impurities from the edge of a silicon wafer, not the top surface. Examiner maintained that it would still be obvious to employ the teachings of Lawrence '875, since Lawrence '875 teaches a suitable silicon etchant. Applicant's Representative argued that the data presented in the Specification, specifically in Figure 3, is evidence that performing an alkaline etch plus acidic cleaning gives an unexpected result, by reducing copper contamination below the limit of detection. Examiner maintained that while the data in the specification may indicate that different results are obtained using the inventive method versus Applicant's admitted prior art method, it is not clear that any such differences are unexpected. Examiner indicated that because the chart of Figure 3 compares the results of single step cleaning methods to the result of a two-step etching and cleaning, it is not clear that getting better results with a two-step method versus a single step method would be unexpected. Examiner asserted that one of ordinary skill in the art would expect to get an even cleaner wafer with a two-step etch and clean, and that a prima facie case of obviousness for the claimed method was clearly set forth in the last office action. No agreement was reached.
